

Thesis Statements

A thesis statement is the main idea or argument in a paper. Thesis statements provide writers with a focus for their paper, and they provide readers with a sense of direction.

While the structure of thesis statements can vary widely, the “although/I will argue/because” structure is a helpful starting point until you feel more comfortable with this process!

Although _____ (opposing argument) _____, I will argue _____ (your argument) _____,
because _____ (your reasoning) _____.

Example:

Although some students believe that they are good writers and do not need any assistance from the Writing Center, **I will argue** that the Writing Center can provide a useful service to writers of any stage **because** having someone to bounce ideas off of can improve the overall quality of your paper.

Ask yourself these questions while crafting a thesis:

- Does your thesis answer a question, propose a solution to a problem, or take a position in a debate?
- Is the thesis complex enough to develop throughout an entire essay?
- Is your thesis obvious? If you cannot come up with arguments that oppose your argument, consider revising the thesis.
- Can you support your thesis with evidence?
- Is my thesis interesting? Will it catch my audience's attention?

Tips for supporting a thesis statement:

- **Write your thesis first** It is perfectly okay to free-write during the brainstorming stage of writing without a thesis statement, but it is very helpful to have a thesis while working on the first draft of a paper!
- **Outline** Before you begin writing your first draft, develop an outline that supports your thesis statement.
- **Be flexible** When you develop your thesis statement initially, try to adopt the mindset that it is a “working thesis.” As you begin to write, it is likely that you will either take away or add support to your argument. When you have completed your first draft, go back to your thesis statement and make any necessary adjustments.
- **Reverse Outlining** One of the best ways to make sure you fully developed your thesis statement is to make a reverse outline when you finish your first draft.
 - ◆ Copy your thesis statement, topic sentences, and any major points you make in each paragraph (no more than a sentence each) and paste them into a new document.
 - ◆ Read through the sentences you pulled from your draft in order to determine whether or not you followed your thesis throughout the paper.

Symmetric Functions and Hall Polynomials Ian Grant Macdonald, 1998 This reissued classic text is the acclaimed second edition of Professor Ian Macdonald's groundbreaking monograph on symmetric functions and Hall polynomials. The first edition was published in 1979 before being significantly expanded into the present edition in 1995. This text is widely regarded as the best source of information on Hall polynomials and what have come to be known as Macdonald polynomials central to a number of key developments in mathematics and mathematical physics in the 21st century. Macdonald polynomials gave rise to the subject of double affine Hecke algebras or Cherednik algebras important in representation theory. String theorists use Macdonald polynomials to attack the so-called AGT conjectures. Macdonald polynomials have been recently used to construct knot invariants. They are also a central tool for a theory of integrable stochastic models that have found a number of applications in probability such as random matrices, directed polymers in random media, driven lattice gases, and so on. Macdonald polynomials have become a part of basic material that a researcher simply must know if s/he wants to work in one of the above domains, ensuring this new edition will appeal to a very broad mathematical audience. Featuring a new foreword by Professor Richard Stanley of MIT.

The Discipline of Market Leaders Michael Treacy, Fred Wiersema, 2007-03-20 The classic bestseller outlining tactics for any business striving to achieve market dominance. What does your company do better than anyone else? What unique value do you provide to your customers? How will you increase that value next year? Drawing on in-depth studies and interviews with the top CEOs in the country, renowned business strategists Michael Treacy and Fred Wiersema reveal that successful companies do not attempt to be everything to everyone. Instead, they win customers by mastering one of three value disciplines: the highest quality products, the lowest prices, or the best customer experiences. From FedEx to Walmart, the companies that relentlessly focused on a single discipline not only thrived but dominated their industries, while once powerful corporations that didn't get the message from Kodak to IBM faltered. Presented in disarmingly simple and provocative terms, *The Discipline of Market Leaders* shows what it takes to become a leader in your market and stay there in an ever more sophisticated and demanding world.
